Polycarboxylate acid high performance water reducer

Description:

Dry powder mortar and concrete mortar special poly carboxylic acid powder is based on the new synthetic technology of a new generation of environment-friendly mortar is special high efficiency water reducing agent, is developed after naphthalene series high efficient water reducing agent of the third generation of high performance water reducing agent, water reducing agent is a kind of the company through new process powder made of poly carboxylic acid high performance water reducing agent, the comprehensive index is good, good dispersibility, high water reducing rate, and good adaptability to various cement, green pollution-free, is an ideal high-performance environmentally friendly products. The company's products comply with the gb 8076-2008 national standard high performance water reducer index.

Product performance:

1. Improve construction performance. On the premise of ensuring the mortar indicators, the use of this product can greatly improve the mobility of mortar;
2. Early strength is high. High early strength of mortar can be obtained by using this product. At the same time, the strength of each age can also be greatly improved to shorten the construction period.
3. Improve the durability of mortar. This product has a high water reduction rate, under the premise of ensuring the

construction quality, it can greatly reduce the water-glue ratio of mortar, reduce the shrinkage and creep of mortar after molding and hardening, and reduce the shrinkage and cracking of mortar in the later stage.

Application:

Polycarboxylate acid high performance water reducer (powder) has good adaptability to cement varieties. Mainly used in premixed dry mixed mortar, channel pressure paste, cement-based non-shrinkage grouting, CA mortar, repair mortar, cement-based self-leveling mortar, emery abrasion resistant floor mortar, waterproof mortar and external insulation mortar and other dry mixed mortar.

Safety:

Polycarboxylate acid high performance water reducer (powder) is non-toxic, non-irritating and non-flammable. Please be careful not to touch eyes, mouth and skin during use. In case of accidental contamination, rinse the affected area with plenty of water. Dissolved in water is weakly alkaline, non-toxic, non-corrosive, non-pollution to the environment.
